

PITCHING

SMART DORM SAFETY SYSTEM APPLICATION (SDSS)

Strengthening Security Protecting Students

PROBLEM

UTM Hostel Students feel unsafe, and unprotected

- 1** Unauthorized individuals can enter hostel buildings.
- 2** Students don't have quick way to call for help.
- 3** No visitor logs to track and notify students .

PROPOSED SOLUTION

"SMART DORM SAFETY SYSTEM APPLICATION (SDSS)"

A **mobile application** designed to protect all UTM hostel residents.

FEATURES

- 1 Hostel-Exclusive Access** 
- Only hostel residents can enter using their unique SDSS QR code.

- 2 Digital Visitor Log** 
- Visitor identity, purpose, and IN/OUT times sync straight into the App

- 3 Instant Notifications** 
- Students receive updates on:
- Maintenance schedules
 - Security alerts
- 4 Emergency Panic Alert Button** 
- One-tap SOS sends the student's details + location to UTM Security

WHY SDSS MATTERS

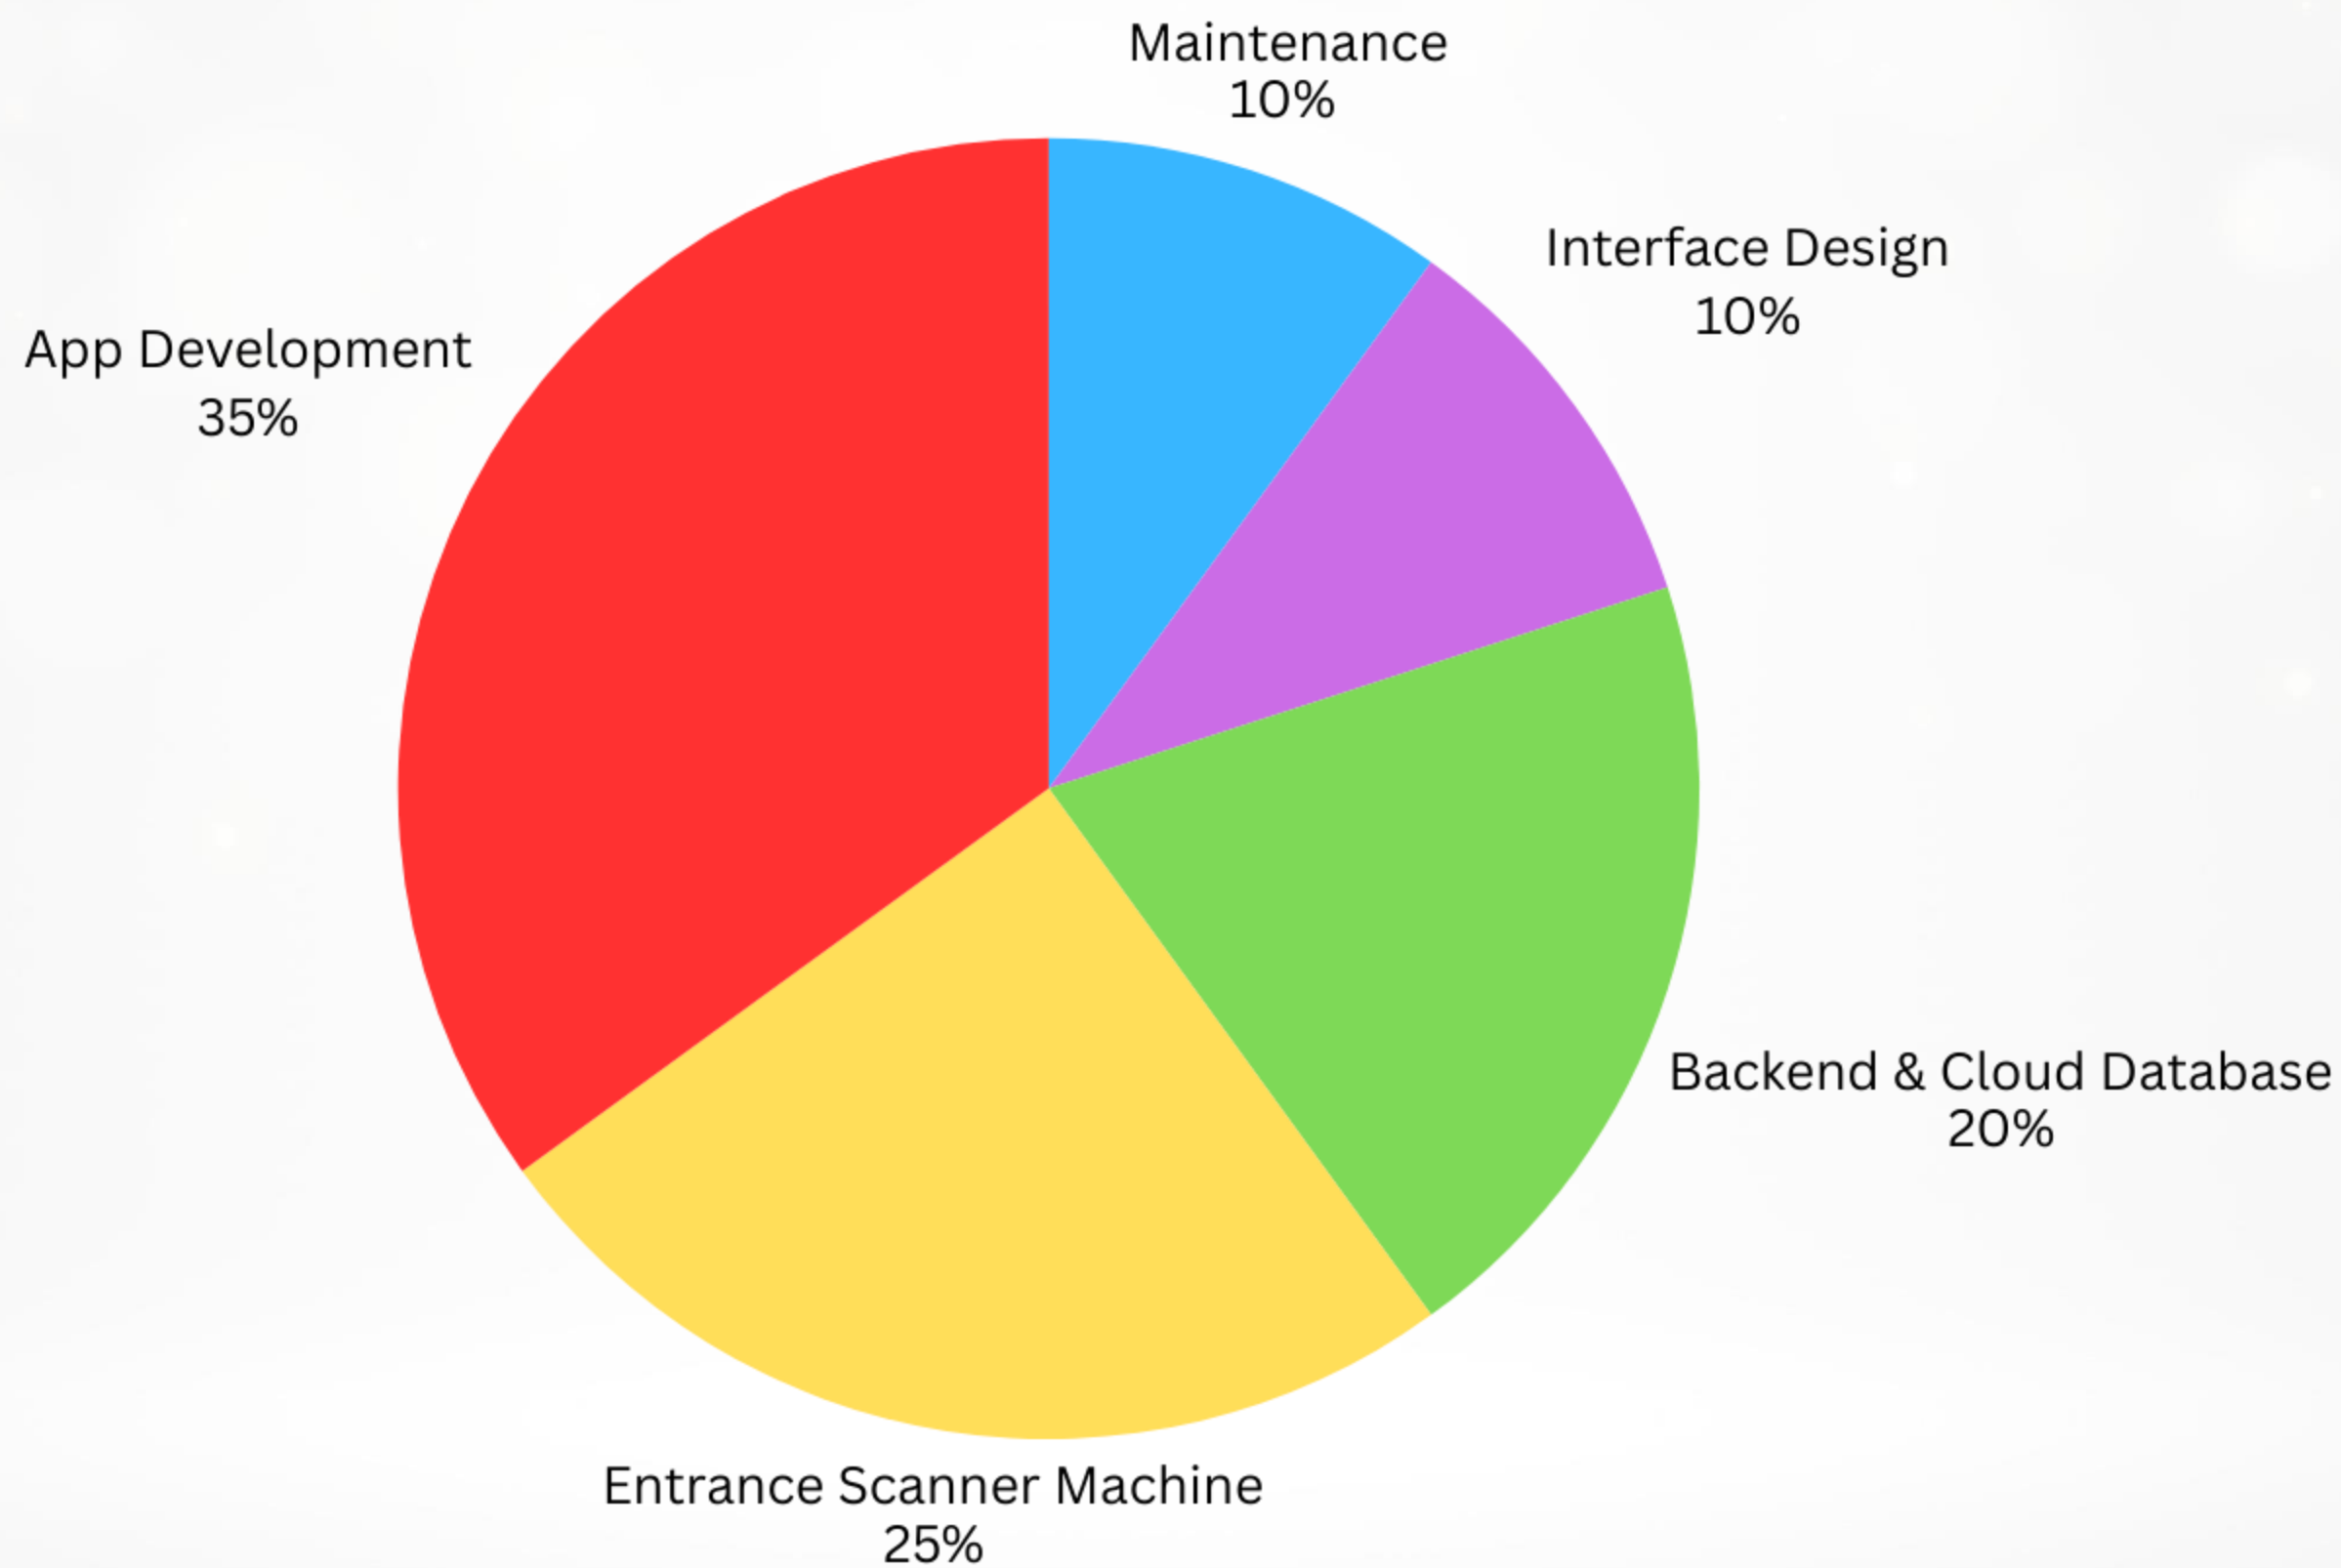

- Protects 14,000+ hostel residents.
- Reduces unauthorized entry by 90%.
- Speed up emergency response by 60%.
- Digital visitor logs provide clear visitor record, help student stay alert .

WHAT WE ASK FOR

Collaborator: UTM Security Department

Budget Estimation: RM 85000

FUNDING ALLOCATION

A top-down view of a desk with a laptop, a cup of coffee, a pen, glasses, and a plant leaf.

THANK YOU
