SKUDAI, June 2025 – Universiti Teknologi Malaysia's Faculty of Computing successfully organised the Technopreneurship Seminar with a theme entitled "Empowering Innovation Through Emerging Technologies" to encourage students and enrich their knowledge in technopreneurship.

The seminar was meant to introduce students to experiential learning through the convergence of theory and practical applications. Its most fundamental objectives were to introduce students to new technologies, to stimulate their entrepreneurial spirit, and give them practical skills in the digital economy. Through the module, students were actively involved in event planning participation, showcase management, and marketing campaigns, hence providing them with a hands-on experience in event planning and teamwork.

The seminar also featured an array of industry-specific talks on issues from digital innovation in the cloud, robotics and entrepreneurship, and the importance of professional network and personal branding. This program not only enriched the learning experience of the students but also made them confident, future-ready technopreneurs who were equipped to make meaningful impacts on society and the tech industry.

Figure 1: The Technopreneurship seminar was officially started with a speech from the deputy dean for research, innovation and development of Faculty of Computing.

The Technopreneurship Seminar 2025 held on 26 June 2025 at Dewan Kejora, N28A, Faculty of Computing, UTM Skudai, was a half-day event under FCRI Day. The seminar kicked off with a welcoming session and opening speeches by esteemed faculty members and special guests. Then, it featured three keynote speakers from leading companies—Huawei Malaysia, DF Automation & Robotics, and TG Human Resource Management, each bringing a unique perspective from their industries. The event also included interactive sessions such as a lucky draw, exhibition booths, and voucher giveaways, with technical support teams ensuring seamless audio-visual delivery throughout the day. Finally, the seminar concluded with a token of appreciation ceremony, university anthem, and a group photo session to commemorate the successful event.

Figure 2: Mr Chan from HUAWEI technologies shared resume submission form to students who are interested to join the company.

The first speaker, Mr Chan Weng Hun, Head of Cloud Core at Huawei GSRC Malaysia, shared his speaking with topic *“Elevate Your Potential with Huawei”*. Mr Chan shared about what Huawei is, their vision and mission. He also provided an overview of the company’s achievements and growth from its inception to present day. Moreover, he shared the Huawei’s plans in the future, especially focus on advanced 5G technology and artificial intelligence (AI), that offering students a view into the company’s roadmap in the future. He further introduced

a wide range of career opportunities that available at Huawei and encourages students to explore the potential roles in the company.

Second speech was delivered by Dr Yeong Che Fai, CEO and Co-Founder of DF Automation & Robotics Sdn. Bhd., who shared an inspiring talk titled “A UTM Alumni’s Journey to Global Robotics.” Dr Yeong emphasised the importance of leveraging university connections and support systems to scale globally. In addition, he pointed up that student should not treat their Final Year Project (FYP) as just an academic requirement, but as a stepping stone to real-world innovation. He also highlighted that what we study today may not fully prepare us for tomorrow, so he urged students to actively seek growth through external competitions and activities, such as ROBOCON. His talk served as a powerful reminder that entrepreneurial mindset, continuous learning, and bold self-investment are the real keys to success in tech.

The next speech was delivered by Mr Russell Marland, Senior Operations Director at TG Human Resource Management Sdn. Bhd. He share the talk about building network and avoiding common pitfalls. Mr Russell shared his personal advice on how students can effectively manage their LinkedIn profiles to build a strong professional network that can open doors to various career opportunities. For example, put a professional profile picture that has clearly focus on face, neither a selfie nor too casual picture. He also shared strategies for making meaningful connections in the professional world, including tips on personal branding, networking etiquette, and how to make most of online platforms like LinkedIn. For instance, rather than sending a generic connection request, write a short note to the connection with maximum of three-hundred words so that the connection would know you better. Mr Russell also focused on common networking mistakes, such as failing to follow up after the initial meetings or not engaging in meaningful conversations. He emphasised the long-term benefits of supportive network and how students can avoid these pitfalls to ensure successful career growth.

Figure 3: Participants are listening to the talk attentively in order to improve their LinkedIn profile page.

While the seminar was largely successful, a few challenges impacted the overall attendee experience. One notable issue was the lack of engagement from some participants. Despite the speakers' efforts to encourage interaction, several attendees appeared distracted, as some were engaged in unrelated conversations while others were focused on their devices during the sessions. This disengagement affected the atmosphere of the seminar and highlighted the need for more interactive activities or audience participation segments in future events to sustain attention and involvement.

Technical difficulties also posed a challenge. Issues such as inconsistent audio during video presentations and delays caused by slide transition problems disrupted the flow of several sessions. These interruptions not only affected the timing of the event but also detracted from the professional delivery of the speakers' content. To improve future seminars, organizers could benefit from more rigorous technical checks and the implementation of contingency plans to ensure a seamless experience for both presenters and attendees.

Figure 4: Students are queuing up to claim food vouchers from companies after the talk before leaving.

The Technopreneurship Seminar: Empowering Innovation Through Emerging Technologies successfully achieved its objective of equipping students with essential knowledge and inspiration in the field of technopreneurship. Through impactful sessions on cloud technology, robotics, and professional networking, the seminar broadened students' understanding of how emerging technologies are transforming the modern business landscape. Despite encountering challenges such as participant disengagement and technical setbacks, the event overall served as a meaningful platform for experiential learning. Students gained not only industry insights but also valuable opportunities to connect with professionals and enhance their readiness for careers in the tech-driven digital economy. With improved engagement strategies and technical preparation, future iterations of the seminar are poised to deliver an even more impactful experience.

Reflection by Joanne Ching Yin Xuan

From my perspective, being part of the technical team for the Technopreneurship Seminar organized by the Faculty of Computing at Universiti Teknologi Malaysia was a truly valuable experience. The seminar, themed “Empowering Innovation Through Emerging Technologies,” aimed to inspire students and expand our knowledge in the field of technopreneurship. I was responsible for ensuring the technical aspects ran smoothly during the event, and this role taught me a lot—not only from the speakers but also through the process of preparation and teamwork.

Before the seminar started, I worked closely with my team to manage the technical setup. We collected slides from the speakers, tested them on the seminar computer, and made sure everything worked perfectly. I also learned how to use the projector, check the sound system, switch slides efficiently, and make sure that both audio and video content played correctly. We studied the program flow in detail so we could respond quickly during session transitions, including Q&A segments.

Throughout the seminar, I also gained a lot of knowledge from the speakers. Mr. Chan Weng Hun from Huawei Malaysia emphasized the importance of confidence, adaptability, and the balance between technical and soft skills. Dr. Yeong Chee Fai inspired us to take on challenging final-year projects and reminded us that learning continues beyond university. Mr. Russell Marland gave us useful tips on building a strong LinkedIn profile and creating a professional online presence, which is something I now see as very important for my career.

This experience helped me understand the importance of both technical abilities and soft skills. By working behind the scenes, I improved my teamwork, communication, and problem-solving skills. At the same time, the seminar motivated me to become more confident, take on challenges, and keep learning. I feel proud to have played a role in this event and am grateful for the opportunity. It helped me grow personally and professionally, and I believe it has better prepared me for my future career in technology.
